PROFILE

Product Manager with **5+ years of experience** building and scaling **0→1 B2C consumer products** with a focus on **creator tooling, content platform strategy, and user retention.** Proven track record of launching **AI-powered systems** that **scaled content velocity by 15x** and **reduced churn to <3%.** Strong in rapid experimentation, data-led decision making, and designing high-retention user experiences.

EXPERIENCE

BrightCHAMPS Tech Pvt. Ltd. — Bengaluru

BrightChamps is a global Edtech platform delivering live, expert-led courses to K–12 learners across 30+ countries, offering a future-ready curriculum in coding, robotics, financial literacy, math, generative AI and communication skills,

Senior Product Manager | Consumer & Growth — Apr 2024 - Present

- Defined and shipped Geeta-AI, **an AI content generation pipeline** (RAG + FastAPI) that automated worksheet creation; **scaled output 15x**.
- Led **Math 0→1 launch** in **3 months,** a live **group-class platform** with **WebSocket infrastructure** and 10+ interaction types to **enable 1:20 scale.**
- Designed the quality scoring system, linking qualitative student experience signals to **quantitative renewal rates** to build a **predictive retention metric.**
- Own the **product roadmap and OKRs** across **4 simultaneous verticals** (Math, Nano Skills, Content Ops, Platform) with cross-functional teams spanning engineering, design, content, academy, and sales.
- Built a **creator-facing WYSIWYG preview tool** to QA AI-generated content, completely eliminating a **15% platform crash** rate before publishing.
- Drove Nano Skills (self-paced micro-learning modules) **GTM & monetisation strategy**; shifted from cash discounting to a **digital currency model**, driving **4,000+ paid enrollments and +5% gross margin** in first year, with **no incremental sales spend.**

Product Manager | Platform & Growth — Feb 2023 - Mar 2024

- Built the **CMS** that made lesson creation fully **self-serve for teachers,** previously engineering-gated at ~50 lessons/month; **3,000+ lessons** shipped in 2 years with zero engineering dependency.
- Led **company-wide platform migration**, merging BrightChamps, Education10x, and Schola into a **unified architecture** with phased **ETL cutovers,** automated integrity checks, and rollback scripts; **100% user migration with zero class disruption.**
- Ran a **rapid acquisition experiment** on FinLit: converted a passive teacher-led demo into an **interactive student-led experience**, putting the product in the student's hands at the point of purchase; **conversion recovered from 5.7% to 14%**, validating the model for scale.
- Scaled the validated model into Adhyayan, a **0→1 gamified learning platform** with 40+ interactive templates, storylines, and a post-class thematic quiz galaxy; **post-class completion jumped from under 40% to 90%+**, cutting user churn from 10%+ to under 3%.
- Introduced **parent onboarding and feedback flows** with structured milestone check-ins and progress visibility; improved **time-to-first-action by 60%** and significantly reduced **support dependency by 80%.**

Wheelseye Tech Pvt. Ltd. — Gurgaon

WheelsEye is a logistics technology company providing fleet management and booking solutions, with its Marketplace platform enabling consignors to manage truck booking and tracking more efficiently.

Product Manager | Consumer Marketplace — Mar 2022 - Jan 2023

- Engineered a **real-time algorithmic matching engine,** slashing confirmation times by **99%** (8 hours to 5 minutes) and boosting marketplace liquidity.
- Re-architected the onboarding funnel with automated digital KYC, reducing user **Time-to-Value from 1 week to 10 minutes.**
- Built a **real-time billing and OTP payment system,** eliminating manual invoicing errors and ensuring payout accuracy and trust.

Arth Design Build (Tata Projects Limited) — Hyderabad

Arth Design Build (now Arth Tech Global) is a digital construction company - an associate of Tata Projects Ltd.; delivering BIM/VDC, Digital Twin and construction-tech services across residential, commercial and infrastructure projects.

Associate Product Manager | BuildwIT (0→1 SaaS) — Apr 2019 - Mar 2022

- Owned **BuildwIT 0→1** end-to-end: B2B SaaS feasibility tool for architects, from **user research and persona definition** through roadmap, wireframes, and **6-team sprint cadence.** Secured **10 paying clients within 2 months of MVP** across residential and mixed-use segments.
- Built **process automation** that cut delivery time by **95%** and errors to **under 3%**, saving **1,000+ hours** and **73.6L in a single month.** Identified the problem, designed the system, and shipped it without a product team.
- Defined **GTM strategy** for Arth's VDC practice from zero to new tech practice, successfully establishing a **SGD 50,000 monthly** revenue line.

EDUCATION

Indian Institute of Technology, Kharagpur — Kharagpur

Bachelor of Architecture (B. Arch. Hons.) | Architecture & Regional Planning — 2012 - 2018

SKILLS

Product: 0→1 product development, consumer product strategy, product roadmapping, OKRs, KPI design, user research & personas, customer journey mapping, hypothesis testing, rapid experimentation, A/B testing, go-to-market, pricing & monetisation, user growth, omnichannel experience design, Agile/Scrum.
Analytics: Funnel & cohort analysis, user segmentation, retention & growth loops, DAU/MAU/churn metrics, SQL, forecasting.
Tools: Figma, Mixpanel, Amplitude, Metabase, GA4, BigQuery, MoEngage, Jira, Miro, Excel.
